

Enabling a new open education future with EPrints

A powerful and customisable digital content platform designed specifically for the sharing of teaching and learning materials.

Host, organise, share and collaborate in one place.

The EdShare community includes:

Flexible solution

Whether for your school, collaborative network, Institution or organisation and whether you intend to share your resources locally or as open educational resources. EdShare is flexible and adaptable to meet your needs. Host, organize, share and collaborate in

Open Content

All open content behind courses discoverable in its context of use or as standalone resources

Creating Open Courses

Flexibility for anyone in the institution to create an open course - perhaps a structured MOOC, short open course or self-paced tutorial

Empowering the Community

Empowering the community be more than just consumers, by enabling mechanisms for evaluation, metadata crowdsourcing, contribution, creating and sharing their own learning journeys and recommendations

Trusted, reliable software

Built upon the open source repository software EPrints which has been managed, developed and supported by the University of Southampton since 2000.
