Carers Journey

Julie Kendall and Diane Asamoah

United Kingdom

Julie Kendall: I am an Impact Member at the University of Worcester and have been for a number of years now. As an Impact member I share my lived experience of my journey as a carer for my mom. I wanted to share this experience with students whilst in training for caring professions in order to try and ensure that in their practice the carers voice is always heard and future carers would have a more positive journey.

Diane Asamoah is a Senior Lecturer at the University of Worcester in the UK. She teaches on the MA and BA Social Work programmes and is the course lead for Continuing Professional Development Social Work programmes. Her main areas of interest are adult social care, dementia, domestic abuse and anti-racism.

A poster which depicts Julie's journey as a carer
